## APPENDIX

The maximum reserve valuation interest rates are based on reference interest rates, which are averages of corporate bond earnings published by Moody's Investors Service, Inc., and weighting factors prescribed by Section 4217, which defines running averages of the published monthly yield rates for 12-month and 36-month periods.

The following table shows the 12-month and 36-month yield averages for recent years:

The maximum nonforfeiture interest rate for Life Insurance, under Section 4221(k), for a particular issue year, is equal to $125 \%$ of the maximum reserve valuation interest rate for the same issue year, rounded to the nearer $1 / 4 \%$.

Should the computed maximum reserve valuation interest rate for Life Insurance (other than Single Premium Life Insurance covered in Category B on pages 2-4) for a particular issue year be different from the actual maximum reserve valuation interest rate for the next previous issue year by less than $1 / 2 \%$, then the maximum reserve valuation interest rate for such particular issue year will be the same as that for such next previous issue year.
