## **Additional Glossary**

**Graduation Rate:** The percentage of students who graduate from an institution. This shows students who began their studies as first-time, fulltime degree- or certificate-seeking students and completed their degree or certificate within 150 percent of "normal time." For example, for a fouryear school, the graduation rate would be the percentage of students who completed that program within six years or less.

Loan Default Rate: The percentage of student borrowers – undergraduate and graduate – who have failed to repay their federal loans within three years of leaving a particular school. A low loan default rate could mean that the institution's students are earning enough income after leaving school to successfully repay their loans.

**Median Borrowing:** The amount in federal loans the typical undergraduate student takes out at a particular institution. It also indicates the monthly payments that an average student would pay on that amount using a 10-year repayment plan.
