The New York Department of Financial Services seeks to build an equitable, more transparent and resilient financial system that benefits New Yorkers and supports business. Through engagement, data-driven regulation, and operational excellence, DFS is responsible for empowering consumers and protecting them from financial harm; ensuring the health and stability of the financial entities we regulate; and driving economic growth through responsible innovation.

The Department of Financial Services (DFS) Research and Innovation Division is seeking candidates for the position of Program Research Specialist 3 in the Virtual Currency Unit within the Research and Innovation Division. This role will support the Division in the ongoing supervision of virtual currency entities. The Program Research Specialist 3 will help inform risk-focused supervision and ongoing monitoring approaches in the virtual currency space. Duties include, but are not limited to:

- Works with large and complex data sets to solve problems and develops and recommends objectives while using different analytical and statistical approaches;
- Reviews and monitors quality of data submissions by Virtual Currency entities; monitoring variances, identifying trends, and recommending relevant actions to management;
- Reviews financial reports from supervised entities;
- Designs and prepares comprehensive periodic reports in virtual currency;
- Maintains database integrity by entering, verifying, and backing up data;
- Participates in the development of key materials for senior leadership briefings and decision-making; and
- May supervise lower-level clerical staff.

Preferred Skills:

- Minimum of three years of professional experience, financial services experience preferred.
- Fluency in economic modeling, economic impact analysis, and/or financial modeling.
- Comfortable working with large volumes of data.
- Experience with data querying languages (e.g. SQL), scripting languages (e.g. Python).
- Experience with or statistical/mathematical software (e.g. R, STATA) is also preferred.
- Excellent communication skills.
- Highly motivated and effective working autonomously and as part of cross-functional teams.
- Ability to multi-task across projects and detail oriented.
- Bachelor's degree in computer science, data analytics, mathematics, economics, or equivalent technical subject is preferred.
